**A. E. MICHAEL,**  
A GOOD PLACE TO TRADE.

### Inga Councillors.

The Councillors of Inga M.D. No. 520 met in Stony Plain on Friday last, with all the Councillors present, and Reeve Tattersall in the chair. Mr R Kidney of the Dept. of Municipal Affairs was present.

The first item on the bill was a discussion of road work done the season of 1924 in Councillor Shaw's division. Mr D McDonald led the attack.

The matter involved seemed to be some work performed (or not performed) by Mr Rod McLeod, and for doing which his name is alleged to appear on a road foreman's pay-sheet. A very brilliant defence was put up. Finally, Reeve Tattersall advised the prosecution to either bring in a sworn declaration embodying statements made to the Councillors, or lay an information and complaint before a J. P., when the matter in dispute would be attended to by the Councillors.

Several agents representing road-making machinery were present, and addressed the

Councillors on the merits of their wares.

Several requests for an increase of bonus under the Mothers' Allowance Act, were heard.

A money claim was presented by Anton Tyrkalo, for land expropriated for the road west from Blueberry church, and for the expense of fencing he was put to. The total claim was around \$180, which the Councillors considered excessive. The Reeve made a tentative offer of \$80 for a settlement in full, which Mr Tyrkalo has now under consideration.

Four or five ratepayers were present, making inquiries respecting caveats which had been placed on their land for non-payment of taxes, in accordance with the provisions of the Tax Recovery Act.

### Heard Over the Phone.

Exasperated Lady Subscriber—Say, operator, are you all crazy down there?

Operator—I'm sorry, madam, but we're not allowed to give out information.

### CLOSING NOTICES.

The business houses and the three elevators in Stony Plain close every Wednesday at 3 p. m. during August.

### LOCAL NEWS.

Mrs James Smith returned to Stony Plain today, after a six-weeks' visit with friends in Calgary.

Mr and Mrs L Kowensky are summering at their cottage at Edmonton Beach.

Miss Amaelia Miller has resumed her duties at the Miller General Store, after a vacation spent at Edmonton Beach.

John Helsor, Lincoln, Neb., is visiting here with Mrs Fierstein.

Mr V L Kellough has been confined to the house this week, thru illness.

Mr and Mrs D W Pattie returned yesterday from Vancouver, and leave today for their home at Blairmore.

Jac Schoepf had his left arm swollen pretty badly on Friday last, from the sting of an insect. Dr Walton attended the injury.

Jack Shearer left for Calgary on Monday.

The Federal elevator, which had been closed for several weeks while Manager Miller was on vacation, is now open for business.

M Duchesne unloaded 16 binders (a variety) in 90 minutes the other day. Louie Fuhr is getting in a carload this week.

Monday's train from Prince Rupert was seven hours late.

The Farmers' Dairy Co. has opened a cream buying station in Stony.

An agitation has been started to have the Stony Plain "Booster Guides" delivered. The money for these was collected from local businessmen last November by two strangers.

The rain storm the beginning of the week did some damage to the local phone lines.

At the meeting last week of Stony Plain town councillors the matter of repairing the road running north from town, came up, and it was recommended that 400 tamarac poles be purchased and laid down in the two bad holes before the freeze-up comes.

Evangelists Reiner and Reile, who have been conducting revival services in the German tongue on Main St. for the past week, are meeting with good success, each meeting so far being well attended.

At Golden Spike, on Sunday August 2d, to the wife of Mr Clarence Creighton, a son.

On August 8th, to Mr and Ernest A Pitzler, a son.

In Stony Plain, on Monday August 10, to the wife of Mr A K Ulmer, a daughter.

The big attraction Friday, August 14, will be the dance at Holburn Hall by Helge Anderson's famous Orchestra.

is assured, so be best prepared for it by making your selections from the following lines:

### Plymouth Binder Twine

550 and 600 foot lengths; treated against ravages of mice, etc.

### Myers and Beatty Hay Carriers and Barn Equipment.

Hay Forks,  
\$1.25 to \$1.90.

### North Star OILS.

Wm. Penn and French Tractor and Automobile Oils.

Axle Grease and Hard Oils.

Gutta Percha Belts, Hose, Packings.

We have a splendid variety of Oilers, Wrenches, Punches, Cold Chisels, etc. to select from, at

## Oppertshauser's.

## \$1000 REWARD FOR A BIBLE TEXT

Proving that the First Day of the week, commonly called Sunday, is the day to be kept holy as the Sabbath in the New Testament.

"Why Do Protestants Keep Sunday?" subject for Sunday, July 16 8 p.m., in the tent at Stony Plain.

In German language only.

## Production And Export Of Pure Seed Is Becoming An Important Industry In Canada

Canada is making very marked progress in the production and export of pure seed, and the annual meeting of the Canadian Seed Growers' Association proved the past year to have been an outstanding one in this regard. Between the two meetings, according to the records presented, the association's crop registration service had increased almost one hundred per cent. In 1922, there were registered about one thousand fields and in 1924 about two thousand fields. In round figures the acreage of seed crops registered in 1924 were as follows: Wheat, 17,000 acres, 355,500 bushels; oats, 11,500 acres, 482,000 bushels; barley 500 acres, 18,000 bushels; flax 960 acres, 9,200 bushels; alfalfa 4,000 acres, 480,000 pounds.

The year 1924 was a very active one for the association with a great deal accomplished. Outstanding were the organization and putting into operation of two new co-operative units of membership for the assembling, cleaning, storing and selling of registered seed stocks, one of these being located at Moose Jaw, Saskatchewan, and the other at Selkirk in Manitoba. The demand for the seed products of these plants was in excess of available supplies.

To meet the requirements of members desiring cleaning machinery which would be efficient for preparing seed grain for the grades "Registered" and "Extra No. 1" the association found it necessary to go abroad and import machinery from France. Seven units of the Marot Machine have accordingly been delivered to private growers and Dominion and provincial stations at Lacombe, Alberta; Maud, Manitoba; Winnipeg, Manitoba; New Liskeard, Ontario; Kempenfelt, Ontario; Guelph, Ontario; and Fredericton, New Brunswick.

During 1924 nearly 70,000 bushels of pure seed grain were handled and marketed by the Alberta Provincial Seed Plant. In Southern Alberta, from the new plant established for alfalfa seed, some 250,000 pounds were sold from the 1924 crop. A census of the year, according to the association secretary, was the marked interest evinced in the registration of fodder and forage seed crops. Elite stock seed of special strains of such crops as timothy, alfalfa, sugar beets and mangels are now being distributed for multiplication, principally in the prairie provinces and British Columbia, and it is quite apparent that in the course of a few years fodder and forage pure seed production will be as important as cereal seed today.

### Great Variety Of Cheese

Thirty-three Different Kinds Are Made In British Isles

An official report shows over 200 varieties of cheese known in the present time. Of these, thirty-three varieties are made in the British Isles, where, it is pointed out, different districts have strikingly marked preferences in the matter of texture of color of cheese. Thus Lancashire folk are specially fond of "Manchester White" cheese, while Norfolk people prefer a brick red variety. Derby, Gloucester, Leicester and York each produce what may be termed regional cheeses, and foreign competitors color their cheeses for these markets accordingly. "The well-known Roquefort cheese is made of sheep's milk, while Gruyere is made from the milk of goats. One of the queerest kinds is Schapelle, a Swiss green cheese, which is so strong in flavor that only a fragment is eaten at a time.

Champion U. S. Wheat Grower Northwestern Kansas claims a champion wheat grower in Albert Weaver, of Bird City, Mo. Weaver has harvested 4,200 acres of wheat this year, amounting to more than 90,000 bushels. He expects the crop to net him in excess of \$120,000.

A Good Investment The foundations of the Windsor fortunes were laid by a "Victorian" who bought Swiss Canal stock on the recommendation of her chief adviser, Diarsell. It was a good buy and gave the Queen many millions of dollars to leave to her children.

W. N. U. 1928

### Bees Are Not Pugnacious

Will Not Sting Only When They Recognize Danger

Popular belief has it that the bee is a savage little creature put on this earth to sting people. Incidentally it makes a little honey, but its great mission in creation is to be ever on the alert for a person to pierce and sting.

When a bee is at work on flowers you could hardly force it to sting you; and when one gets into your house, stinging is the farthest thing from its mind. It wants to get out from just as badly as you want it out; and all you have to do is open the door. There is not the least cause for excitement or effort to kill the bee.

If you ruin, especially if you strike at it, it may sting you; but if you hold your head down, keep your hands at your sides, and walk quietly away, the bee is pretty apt to turn back after it has forced you to retreat to a safe distance.

Surprising things can be done with bees by the person who is fearless, kind and deliberate. An acquaintance tells me that he has many times placed his bare hand right over a bee that was busy on a flower and made the little creature a prisoner in his palm. He says that as long as the grip remains loose enough for the bee to move a little and seek escape, there will be no effort to sting; but if the hand-tightens, the insect recognizes its danger, and fights for its life in the only manner it knows. My acquaintance worked with bees for many years, and he is emphatic in denying that they are quarrelsome.

### A Costly Experiment

Scientist Responsible For New England's Plague of Moths

Fifty-six years ago a certain scientist brought from central Europe to Massachusetts a glass containing a few moths with the hope of breeding therefrom a new type of silkworm. The jar, falling from a window, broke, and so fell the founders of New England's greatest plague. The scientist, realising what might be the result of his carelessness if the moths were not speedily captured, worked day and night trying to trace them. Advertisements were inserted in all the newspapers calling on people to kill the insects. The readers smiled and said, "What harm can a few moths do?" They are answered now with a bill for \$60,000,000. The moths began to breed in Massachusetts, and soon a fund was established to fight them. It amounted in the first year to \$500. Up to now the Federal Government assisted by individual states, have contributed \$26,000,000 as a fighting fund.

### Bamboo A Species Of Grass

Is Most Rapid Growing of Any Plant Known

"The giant bamboo are true grasses. They send underground stems long distances through the soil, binding it together with hard, flat-like root stalks, or rhizomes. From this network of roots and rhizomes they send upward the most rapid growing shoots of any plant known. While the shoots are so fresh and tender that they can be snapped off with the hand and cooked to an asparagus-like delicacy; bamboo wood is the strongest known timber for its weight; and its hard, siliceous exterior makes it serve for knives and whetstones. Despite its numerous uses the grass is valued for its beauty. The forest of China and Japan lend a charm to many landscapes.

Will Ship Grain Via Vancouver The United Grain Growers will ship grain through Vancouver next crop year, for the first time since wheat moved west. The Vancouver board of harbor commissioners has leased elevator No. 3, a plant with 700,000 bushels storage capacity, to the big grain organization.

Archie (going into shop where musical instruments are sold): "I've heard that you sell good instruments." Shopkeeper: "Yes, sir; ours cannot be beaten." Archie (walking out): "Ah! I'm afraid that won't do. I want a drum."

### The Greatness Of Canada

Dominion Has Only Touched Outside Edge Of Development

At such a moment as this we do well to recall that Canada is a land of big distances, and her great men have been great because of the largeness of their vision. "Short views are even less fitted in the circumstances of today than they were in the days of Macdonald," Upper and Mount Stephen, Strathcona and Van Horne. Mr. Larkin does well, therefore, in estimating the future to remind Englishmen that since the close of the Victorian era the population of Canada has increased from just over five to about nine and a quarter millions; she has emerged as one of the great grain-growing countries of the world, and a substantial producer of dairy produce; she has developed her manufactures so that her industrial output has increased five-fold; and she has definitely entered the ranks as a great exporting nation. As for the future, what a tale is suggested by these two facts, that of Canada's territory at least 300 million acres are available for cultivation, so that almost limitless stretches still await the settler. There are 3,250,000 developed horsepower, and by the end of the present year this figure will be something like 4,000,000 horsepower. The moving in the Dominion upon its coal bill is estimated at \$60,000,000 a year.—Canadian Gazette, London.

### Gold Mines In Britain

Big Reef Runs Under Forest Of Dean Near London

Gold mines have been known and worked in Great Britain for centuries. One of Queen Elizabeth's most prized possessions was a goblet made entirely of gold taken from a river in Scotland. The medals struck to commemorate the coronation of Charles I. were made of British gold, a circumstance that can be linked with the fact that Princess Mary's wedding ring was also made of gold from Wales.

Ever more interesting is the fact that there is a big gold reef within a two or three hours' journey of London. It runs under the Forest of Dean, and its existence has been scientifically established. The configuration of the reef is very similar to that of the Rand, in south Africa, and some experts predict that one day gold will be found there in paying quantities.

### Treaty Will Benefit B.C.

Two million dollars increase in the newspaper business and a similar increase in the canned salmon industry of British Columbia, are estimated to be some of the benefits that British Columbia will enjoy under the Australian treaty, now passed by the Canadian Parliament and which, according to advices from Melbourne, will meet with little opposition in its amended form from the parliament of the Commonwealth.

Isn't it strange how your job bores you and how many others would be tickled pink to have it?

"Darby and Joan"

Chief Far Away Cough and his friend Mrs. Mud Head, of the Blackfoot Indians, attended the McLeod Indian Day celebration and recognized in each other old school mates. They were both well into their teens before the even tenor of their lives was disturbed by the intrusion of the white man. Far Away Cough saw his first Paleface at the age of 14, and they were both nearing their prime when the Palefaces were settling in their midst and they were already old before the first Pacific trail passed over their beloved prairie. Their lives are wrapped up in the history of western Canada, and if they had literary inclinations they could write a history of their country with far greater data to authority than any while historian who has told of the evolution of the west from second-hand information. Far Away Cough is 101 years old and Mrs. Mud Head is 88.

## Greater Interest Being Taken In Promoting And Fostering The Poultry Industry Here

### Manufactures In The West

Western Provinces Must Depend Largely on Grain Production

The industrialization of the prairie west is referred to as a means of satisfying the western farmers and curing them of their desire for free trade by providing them with a home market. One of the advocates of the movement has coined the phrase, "Western workshops for western workers." The idea is a good one, but it would be unwise to expect that the establishment of factories will solve the western problem within the near future. The western wheat crop in 1923 was 452,260,000 bushels, and in 1924, 232,694,000 bushels. It would require industrial revolution to have this product as well as that of other grains consumed in the west or in Great Britain. The prairie west for many years will be in an economic position widely different from that of Ontario and Quebec, and only disappointment can result from failure to recognize this truth.—Toronto Globe.

### Removal Of Sheep Duties

Free Importation From U. S. During Three Fall Months

For all three fall months of September, October and November, the duty of 25 per cent. on grade sheep imported into Canada from the United States for breeding purposes will be removed, according to an announcement by Dr. J. H. Girdale, deputy minister of agriculture.

The reason for this step is the fact that for the past two or three years there has been a gradual decline in the sheep breeding industry in the Dominion. It is felt that, with the removal of the duty, encouragement will be given to Canadian sheep breeders to improve and enlarge their flocks. Owing to the increasing profitability of the sheep raising business, the department feels warranted in taking almost any step necessary to ensure a steady supply of sheep for the growing demand. Prospects for this business are considered exceedingly bright.

### Canada's Production Of Chemical Pulp

Exports of bleached sulphite from Canadian mills during 1924 amounted to 156,868 tons, as compared with 159,873 tons in 1923 and 89,224 tons in 1920. It is very significant that whereas the American chemical pulp mills in 1917 produced 93 per cent of the total chemical pulp consumption of that country, their proportion of the total tonnage in 1924 had fallen to 62 per cent. In the same period Canada's exports of chemical pulp increased 117 per cent, largely as a result of the increased demand from the United States.

Since the success which attended Canada's first overseas exhibition of her poultry at Wembley and at Barcelona, Spain, in 1924, Canadian poultry breeders have come to attach a much greater and wider importance to their industry and become more active and energetic in fostering it. Among other resolutions adopted at the annual meeting of the Canadian Poultry Association was one to ask government assistance in the shipment of live poultry breeding stock to Great Britain and Europe generally with the object of building up a market for Canadian poultry overseas. Recently two hundred White Wyandottes from the ranch of the Hon. J. S. Martin, Ontario's minister of agriculture, left the Dominion to be consigned to the Britains, Sweden, Holland, Denmark and Ireland.

This official interest in the poultry industry synchronizes with the exhibition of a marked degree of interest from many directions in the possibilities of engagement in the poultry industry in Canada. Properly entered upon and intelligently pursued, there is unquestionably opportunity for the expansion of poultry farming in Canada, and certain districts offer peculiar advantages in this connection.

The number of poultry in Canada is showing an increase, there being 42,424,000 of all kinds throughout the Dominion in 1924 as compared with 39,340,200 in the previous year. According to the latest returns there are 98.6 per farm in British Columbia; 79.9 in Alberta; Ontario 79.1; Saskatchewan 76.1; Manitoba 61.7; Prince Edward Island 50.4; Quebec 48.7; New Brunswick 28.2; and Nova Scotia 17.8. The country's output of eggs is likewise on the increase, this in 1924 amounting to 212,648,686 dozen worth \$50,322,430, as against 202,185,508 dozen worth \$48,770,750 in the previous year.

### Teachers Favor Tree Planting

Good-Object Lesson In Betterment Of Home Life

An interesting and important development of the tree planting movement is the attitude which teachers and educational authorities, particularly in Saskatchewan, are beginning to take towards it. Many school grounds have been planted with the assistance of the forestry branch. In Saskatchewan 20,222 seedlings were last spring supplied with 155,000 seedlings and cuttings, and a smaller number were similarly assisted in Manitoba and Alberta. This object lesson in the betterment of home surroundings and improvement of the environment is viewed as very important by western educationalists.

### Says Artificial Rain Cannot Be Produced

No Method Successful In Opinion of Authority on Weather

Dr. W. J. Humphries, one of the greatest authorities on the weather, described to the British Association at Toronto the many efforts that have been made to produce rain by artificial means, such as electric discharge, explosions of gunpowder or shells, the use of chemicals, dusting the sky, spraying liquid air on the clouds, and sprinkling the clouds with electrified sand. He believes that no one of these methods was of the slightest use, in spite of much apparent success attending the efforts of certain "rain-makers."

### Increase In Paper Products

One hundred and fifteen mills in operation in Canada during the past year, produced pulp and paper products to the value of \$187,174,705, as compared with an output of \$188,642,118 for 1923, \$188,485,377 for 1922, and \$184,611,077 for 1921, according to a preliminary report of the bureau of statistics. There was little appreciable change in the volume or value of wood pulp, pulpwood and kindred products, but there was an increase in the production of newspaper, which amounted to 1,358,981 tons in 1924 as against 1,351,541 tons in 1923.

"Look. Here's where we were. The land of the midnight sun. Twenty-four hours of sunshine every day." "But didn't you get ANY chance to wear your evening dress?"

WORLD HAPPENINGS  
BRIEFLY TOLD

The charter of cityhood for North Bay was officially handed to Mayor J. C. McDonald, Aug. 3, by Hon. Charles McCrex, Ontario's minister of mines.

Efforts will be made this summer to transplant Swiss mountain roses to the Canadian Rockies. The roses thrive only at elevations above 3,000 feet.

Mrs. Amelia Burrell, Maniloba's oldest inhabitant, celebrated her 103rd birthday at Portage la Prairie, Aug. 2nd.

The Industrial Workers of the World recently held, at Sydney, Australia, their first meeting since the organization was declared illegal in 1917.

The cotton crop grown within the empire during the past year is estimated at 261,500 bales, valued at £8,373,200.

The first clean-up since the discovery of the Dease Lake gold field was made by William Grady on No. 9 claim. Four days' work brought him in £200 in coarse gold.

Flora MacDonald, the Highland heroine of "Bonnie Prince Charlie," is to have her memory perpetuated by the ruins of her home secluded under the Ancient Monuments Act.

At the age of 78, Sir William Pryke, as senior alderman of the City of London, has been chosen for election as Lord Mayor of London next September.

One person in every ten in Britain is now a member of a co-operative society, and these British co-operative societies did business last year to the value of £115,000,000.

The House of Commons adopted the government's naval estimates, including the programme for the construction of new warships. The bill was passed by a vote of 305 to 127, with little debate.

Wheat production in the world's 17 principal grain producing countries, is estimated by the department of agriculture, Washington, at 2,111,000,000 bushels, compared with 2,065,000,000 bushels in the same countries last year.

The call for volunteers to form an American expedition to go to Morocco to assist the Sultan against the Rif, has enlisted Sgt. Commander W. J. Sussan, formerly of Ottawa, Canada, who earned fame by winning seven decorations as pilot and engineer.

## Planning Great Air Liner

British Firm Will Build First Steel Airship

A great engineering feat will be started by a well-known British firm in the early summer of next year, the building of the world's largest airship, the first steel air liner. It will be about 720 feet long, nearly twice the height of St. Paul's.

The airship will be able to carry a load of 155 tons, and seven engines, with a horsepower totalling 4,200, will drive the monster some 100 miles an hour, at a height of 5,000 feet.

The shed at Cardington, in which the R-101 will be built, is to be enlarged to a length of 812 feet, and will then be the largest building in the British empire.

It is estimated that the airship will be finished by the end of 1926, and will make her first trip to India in 1927.

## To Ease Rubber Situation

New Regulations Allow Export at a Minimum Duty

The British colonial office has announced it has decided to permit from August 1 export of 75 per cent of the rubber production in Ceylon and the Straits Settlements at a minimum duty, this being a 10 per cent increase over the export allowed during the previous three months.

The new regulation includes the Federated Malay States. The British Government also has approved certain concessions in the assessment of the standard of production in the Federated Malay States which it is believed will further ease the situation.

## Building Around Old Capital

An interesting piece of building work is going on in Nohakua, where a new capital building is under course of construction. The walls of the new building, much larger than the old, are being built around the old building while work continues undisturbed.

W. N. U. 1589

CLIPSE  
FASHIONS  
Exclusive Patterns

For Summer Dances and Dinners

Taffeta and flowers express a quaint simplicity in the little evening frock pictured here. The light bodice and full skirt express a type which is very popular with the younger set, and is especially pretty when the crispness of taffeta is allowed to influence the skirt to stand away at the hips. Taffeta of a soft yellow shade, with hand-drawn flowers and leaves scattered throughout, was used for this frock, the full skirt of which is softly shirred to the bodice. The short sleeves and round neck are finished with a narrow piping of the taffeta. Sizes 16, 18 and 20 years. Size 18 years requires 2 1/2 yards of 36-inch or 44-inch material. Price 20 cents.

Home sewing brings nice clothes within the reach of all, and to follow the mode is delightful when it can be done so easily and economically, by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained, so that the inexperienced sewer can make without difficulty an attractive dress. Price of the book 10 cents the copy. Each copy includes one coupon good for five cents in the purchase of any pattern.

## Protect Fur-Bearing Animals

Society in Springfield, Mass., Organized to Prevent Unnecessary Killing

In an effort to reduce unnecessary killing of fur-bearing animals, a campaign has been launched against extravagant use of furs for purposes of decoration. That the necessary slaying may be humanely accomplished, suggestions are welcomed by the organization promoting the movement, which may result in more humane methods of trapping such as the invention of a trap which will kill instantly. The association in question is the American Blue Cross Society, with headquarters in Springfield, Mass., which for three years has been carrying on drives in connection with this work.

It is stated that the Blue Cross Society is not opposed to the wearing of furs as a protection against cold, but only to an excessive use of furs as an embellishment.

## Amplifying Human Voice

The human voice may be amplified by a process known as the public-address system. This may or may not be used in connection with radio. A speaker's voice may be amplified for the benefit of a single audience before whom he stands, or it may be amplified and sent over the radio for hundreds of miles, for the benefit of large assemblies of distant hearers.

## Some doctors know everything about diseases—except a cure.

The world's a stage. Dodge the exits as long as you can.

## SUNDAY SCHOOL LESSON

AUGUST 16

## TEMPERANCE LESSON

Golden Text: He not deceived; God is not mocked; for whatsoever a man sows, that shall he also reap. Galatians 6:7.

Lesson: Galatians 5:13-24.

Devotional Reading: Proverbs 23:29-35.

The Text Explained and Illuminated—

The Flesh Against the Spirit

The power of love, verses 13-15. Brothers, ye also Paul, you are free from the law, but Christian liberty does not mean that you can do as you please; do not use your freedom as a license for indulging your lower impulses, but live in accordance with the law of love. Flesh is used here for "that element of man's nature which is opposed to goodness, and makes for evil. It signifies the entire potency of sin."

Through loving service for others you fulfill the whole divine law, which is, Then shall love thy neighbor as thyself. Paul here quotes Lev. 19:18. Then, remembering that the Galatians were prone to quarrel, he adds, But if ye bite and devour one another—act toward one another like dogs or wild beasts—beware lest you destroy one another.

"No man resolved to make the most of himself can spare the time for personal contention. Still less can he afford to take all the consequences, including the 'biting of his tongue and the loss of self-control' (Abraham Lincoln).

## Will Abandon Island

Land Off North Wales Coast Is Too Isolated

Bardey Island situated off the coast of North Wales is about to be abandoned by its inhabitants. The island is about two miles long and one wide and has its own king. Thirty years ago Bardey had a population of one hundred people, but they have dwindled down to forty-five, who have been living on pine small holdings.

King Love, Prince of the island's monarch, was crowned in 1911, and is now eighty-three years of age. His predecessor, King John II, abdicated, and died in a Welsh workhouse. The youngest inhabitant is a year-old baby.

No motor cars are allowed on the island. The decision to abandon the island was made at a conference of the islanders, the main reason being the difficulty of transport. Although the distance between the mainland and the island is only two miles, currents and tides make the passage one of five miles.

The entry of the French forces into the Ruhr took place January 11, 1923. It caused much talk to flow, and entire pages of the newspapers were devoted to the report of the operation designed to bring about payment by Germany of her reparations obligations. The evacuation, which has been going on for the past month, however, has been totally ignored by the French press and unnoticed by the general public.

At 12 o'clock all church bells at Essen were chimed to observe the official termination of the occupation of the Ruhr by allied troops. Flags were flown throughout the city, and the inhabitants rejoiced.

Inkeeper Had To Pay Fined \$50 By English Judge For Not Admitting Traveller

A traveller in the lake district of England who found himself stranded, owing to a mishap at 5.45 one morning, went to an hotel and rang the bell. No one opened the door, and although he rang again and again, he was unable to gain admission for over an hour, while he stood in the cold and rain.

He brought an action against the hotelkeeper, because he wished to show that innkeepers have a duty to the travelling public which they are legally bound to carry out, and the judge, agreeing with him, awarded him £50 damages.

Germany Rejoices Over Evacuation of Ruhr Occupied By French Forces Since January 11, 1923

French evacuation of the Ruhr is complete, that not a single French soldier remained in the mining and industrial basin after midnight July 31.

The entry of the French forces into the Ruhr took place January 11, 1923. It caused much talk to flow, and entire pages of the newspapers were devoted to the report of the operation designed to bring about payment by Germany of her reparations obligations. The evacuation, which has been going on for the past month, however, has been totally ignored by the French press and unnoticed by the general public.

At 12 o'clock all church bells at Essen were chimed to observe the official termination of the occupation of the Ruhr by allied troops. Flags were flown throughout the city, and the inhabitants rejoiced.

Inkeeper Had To Pay Fined \$50 By English Judge For Not Admitting Traveller

A traveller in the lake district of England who found himself stranded, owing to a mishap at 5.45 one morning, went to an hotel and rang the bell. No one opened the door, and although he rang again and again, he was unable to gain admission for over an hour, while he stood in the cold and rain.

He brought an action against the hotelkeeper, because he wished to show that innkeepers have a duty to the travelling public which they are legally bound to carry out, and the judge, agreeing with him, awarded him £50 damages.

What Canada Produces. Though Canada has but a small percentage of the world's population, she produces:

88 per cent of its asbestos.  
85 per cent of its nickel.  
22 per cent of its pig-iron.  
20 per cent of its lumber.  
20 per cent of its cured fish.

18 per cent of its oats.  
16 per cent of its potatoes.  
11 1/2 per cent of its wheat.  
11 per cent of its barley.

A clock that speaks the time every 15 minutes has been invented.

## OUR CROSSWORD PUZZLE

- Horizontal
- 1—Motor.
  - 7—Harmonize.
  - 13—Cause.
  - 14—Lathered.
  - 15—None of the scale.
  - 16—A parent.
  - 17—Article.
  - 19—Pretense meaning "two."
  - 22—Dissatisfied.
  - 25—Fruit of some trees.
  - 26—Algal.
  - 28—Veiled for mooring.
  - 29—Indication.
  - 30—A western state (abbr.).
  - 31—Medium; ordinary.
  - 32—Advertisement.
  - 33—Bridge.
  - 36—Penny.
  - 37—A thoroughfare.
  - 38—Lamb.
  - 39—Stammer.
  - 41—Toward.
  - 42—Healthy.
  - 43—Before.
  - 44—Story.
  - 45—So it is in state (abbr.).
  - 49—Stage whisper.
  - 51—Twelve (Roman numerals).
  - 52—Myself.
  - 53—Location of Washington (abbr.).
  - 54—Six (Roman numeral).
  - 55—River in Italy.
  - 57—Demand for a repetition.
  - 60—A reptile.
  - 62—Told as a fact.
  - 63—Flock of little chicks.
- Vertical
- 1—Mistake.
  - 2—Required.
  - 3—So it is in state (abbr.).
  - 4—System or belief.
  - 5—Builder of the Ark.
  - 6—Half an egg.
  - 7—Like.
  - 8—An amphibian.
  - 9—Reddish brown.
  - 10—Toward the top.
  - 11—Cloud formation.
  - 12—Prepared for publication.
  - 13—Heavenly body.
  - 21—Davyum (chem. sym.).
  - 23—Public highway.
  - 24—Made into law.
  - 25—Negative.
  - 27—Ship by.
  - 28—Man's name.
  - 32—Large container.
  - 33—Command to a horse or ox.
  - 37—Artfully ashamed.
  - 42—Told as a fact.
  - 43—Flock of little chicks.
  - 44—Vegetable.
  - 45—None of the scale.
  - 47—Edged tool.
  - 49—Land measure.
  - 50—Always.
  - 53—Spectacle meaning "equal."
  - 55—Central America (abbr.).
  - 59—Man's name.
  - 60—Unit of weight (abbr.).
  - 61—Thus.

## Secured Franchise

For Canadian Women Dr. Augusta Gillen Believes in Enlarging Opportunities

Canadian women who enjoy the suffrage, owe a debt of gratitude to Augusta Stowe Gillen, M.D., C.M., who in large measure was responsible for securing this right for her countrywomen. Dr. Stowe, says the London Free Press, was born at Norwich, Oxford county. She is the daughter of two doctors, a doctor herself, and the wife of a doctor, to whom her heritage is a faithful one.

In all issues pertaining to enlarged opportunities for women—educationally, medically, legally and politically—Dr. Stowe Gillen has ever been an exponent and advocate unswerving in her fidelity to the cause of women. She is a woman of brilliant mental and social attainments; a convincing speaker, both progressive and aggressive.

## British Plan Naval Construction

Total Estimated Cost of Ships Will Be \$200,000,000

W. C. Bridgeman, first lord of the admiralty, supplied parliament with official details of the proposed new naval construction up to and including the year 1929-30. During the current year four cruisers would be laid down. They will belong to class A. The following year two cruisers of class A and one of class B will be built. The three succeeding years will have one of class A and two of class B each.

The programme provides for a total of 27 destroyers, 22 submarines of the O type and one of the fleet type, five submarines and a number of other auxiliaries. The total estimated cost is £58,000,000.

What Canada Produces. Though Canada has but a small percentage of the world's population, she produces:

88 per cent of its asbestos.  
85 per cent of its nickel.  
22 per cent of its pig-iron.  
20 per cent of its lumber.  
20 per cent of its cured fish.

18 per cent of its oats.  
16 per cent of its potatoes.  
11 1/2 per cent of its wheat.  
11 per cent of its barley.

A clock that speaks the time every 15 minutes has been invented.

## Answer To Last Week's Puzzle

## Polish Police Have Seized Red Literature

Threequarters of a Ton Discovered At Warsaw

A huge store of Communist propaganda literature, weighing in the aggregate threequarters of a ton, was discovered by the police at Warsaw. It consisted of pamphlets printed in several languages, and apparently formed the main stock of the literature of the Communists in Poland.

The minister of the interior said the Communist party in Poland was not increasing in power. On the contrary, the recent activity of the police against Communist activities had had a distinct effect in decreasing them.

Nations Contributing To League's Expenses

Heaviest Contributor Is Great Britain With France Second

The expense of the League of Nations for the present year will total \$4,373,943, according to the secretary-general of the league. Fifty-five nations are contributing to this year's expense, with Great Britain the largest contributor, to the amount of \$411,478, and France second, with \$364,719. Other large contributors will be China with \$238,741; India with \$200,653; Italy and Japan, \$225,229 each; Argentina and Canada, \$165,655 each; Spain, \$197,035; and Czechoslovakia, \$164,304.

Scientists say that the snow which was solidified to form the iceberg now floating in the North Atlantic fell in Greenland 5,000 years ago.

Rather belatedly a correspondent points out that poets are like watchmen—a spring sets them going.

Supplement to The Stony Plain Sun, Thursday, August 13, 1924.

## Stony Plain District's Big Community Picnic at Edmonton Beach.

\*\*\*

Stony Plain's Civic Holiday was celebrated yesterday in a truly loyal manner, all the business places in town being closed—except one. The first cars to the picnic grounds at Edmonton Beach left shortly after 10, with loads, and the big rubber-neck coach left about 11, loaded down with young people. By 1 o'clock the town was pretty well deserted of people.

At the Beach every preparation had been made for a very enjoyable time, and everyone did enjoy themselves right up to the running of the last event.

The whole affair reflects great credit on the organisation which managed so successfully Stony Plain District's enjoyable Community Picnic.

While the sports were in progress, Miss McMillan, of the Women's Institute branch of the Dept. of Agriculture, delivered a very interesting address to the members of the local Institute in the Rotary Pavilion on the subject of Girls' Clubs.

The Sports—

The baseball game created lots of amusement, but did

not last long, as so many balls were lost which had been knocked into the brush that the game was called in the third; and besides the right-fielder tore his Sunday clothes while searching under the Rotary building for the missing spheres.

The game was between the

When two friends met at First Base.

Lightweights and Heavies. We regret we cannot give the tally, as the score-keeper brought his fish home in the score card and the cat ate it.

Line-up: Lightweights, Ph Altheim, Alex Graden, Geo Oppertshauser, W Robertson, L Wight, Hy Miller, Murt McKinlay, S Elliot, Maltby.

Heavies: W Langer, R E Wood, E Schmidt, J Smith.

Ph Altheim, L Fuhr, O Oppertshauser, G Powell, Jac Ulmer.

A few more innings will be played when the weather gets cooler.

The basketball game was a very interesting affair, and was Girls vs. Men. The girls played all around the men, winning by 8 to 1. Teams—Girls: S McKinlay, F Graden, Amy Foerster, Eva Graham, Zucht. Men: M McKinlay, Henry Miller, T Graden, L Wight, J McCulla. Referee—Annie McKinlay.

Foot race, boys under 10—M Larson 1, A Davis, S Britton.

Foot race, girls under 10—A Bishop, E Dannhauer, E Bishop.

Foot race, boys under 14—A Davis, L Miller, A Britton.

Girls under 14—L Odenbach, E Dannhauer, A Bishop.

Open race, boys over 14—A Treit, S Elliot, A Perrier.

Girls over 14—S McKinlay, M Werner, A McKinlay.

Married lady's race: Mrs D Sutherland, Mrs Wight.

Sack race—S C Elliot, R Wood.

Lady's race—Eva Graham, Miss Michaels.

3-legged race—Ph Fuhr and S Zucht.

Wheelbarrow race—Hans Makulla & L Graff.

Married man's race—E Schmidt, B G Powell, John Ducholke.

Pie-eating contest, L Odenbach.

Throwing baseball—John Barth, G Graden.

Boat race, 100 yards—R B Brooks, John Barth.

## RAILWAYS OFFER NORTH COUNTRY PRAIRIE RATES

Edmonton.—Both the Canadian National and the Canadian Pacific Railways have agreed to amend their offers in respect to operation of the Peace River lines, by undertaking to give the benefit of a prairie rate basis for a temporary period, pending the conclusion of satisfactory terms with the Royal Bank.

Premier Greenfield made a statement to this effect in the legislature.

He said he had received advice from both railways since his statement in the house on Aug. 4, but that this constituted the only new development in the situation, nothing further having been heard from the bank.

The effect of the new undertaking by either railway will be that for at least one season, and perhaps for more, a temporary arrangement will be in force by which the north country will be given a one-time haul rate, thus meeting one of the strongest objections it has put up against the present service. Presumably, no new lease will be necessary if the government decides to let the existing agreement with the C.P.R. continue, thus amending, until the complications with the Royal Bank are straightened out.

## May Be President Of League Assembly

Name of Senator Dandurand, Canadian Delegate, is Mentioned

Geneva.—Senator Raoul Dandurand, chief Canadian delegate, is being prominently mentioned for the presidency of the assembly of the League of Nations, which will begin its sessions here, September 7.

Denmark has requested the secretariat of the league to place on the agenda for the September sessions a project for the creation of a commission of conciliation at the permanent court of international justice at The Hague.

The first reaction in League of Nations circles to the Danish proposal is that it represents an attempt by neutral states to remove from the council of the League of Nations the exercise of conciliation, which hitherto has formed a notable feature of the council's activities, and place it under the jurisdiction of the world court, which would appoint conciliators in any dispute.

## New Air Record Set

Message From Illinois Answered In Fifteen Minutes From Arctic

Arlington Heights, Ill.—For the first time in history, the successful direct transmission and reception of messages to and from the Arctic Polar area was recorded when the MacMillan Arctic expedition answered a query of newspapers from a local radio station.

The expedition, located at Etah, Greenland, approximately 3,700 miles north of Chicago, clearly heard the message, and within 15 minutes the answer came back, scarcely hindered by static and adverse weather conditions.

## Chicago's Crime Increases

Chicago.—Persons are being murdered in Chicago at a rate of more than one each day. A total of 227 have been murdered to date this year. If that pace of the last 211 days continues for the next 154 days, the Chicago murders at the end of 1935 will number 391.

## Support Legion Idea

North Bay, Ont.—A mass meeting of ex-service men, attending the "Soldiers' Day" of the North Bay Old Home Week activities, unanimously gave assurance of their whole-hearted support in making the proposed British Legion of Canada an accomplished fact.

## To Reduce Staffs

Quebec.—Immigration officials here are expecting a general reduction of immigration staffs throughout Canada, but declare that the staff will not be made until after the federal elections. A reduction by as much as 35 per cent. of the personnel is anticipated.

W. N. U. 1239

## Press Delegates Have Reached Honolulu

Canadian Will Leave On Return Trip October 8

Honolulu.—Delegates from Great Britain, Canada and other British Dominions on their way to the third Imperial press conference in Australia, arrived here on the liner Aurang and were warmly welcomed by the representatives of the Government of Hawaii and the press of Honolulu.

Today, the British press party is being entertained by the chamber of commerce to a sightseeing tour, culminating in an official luncheon.

During the voyage from Vancouver, the Canadian delegates organized their section with J. H. Woods, of Calgary, president of the Canadian Press as chairman. The conference will open in Melbourne, September 29. The Canadians in the party probably will leave Australia for the return trip on the liner Makura on October 5.

## Test Flights Successful

MacMillan Expedition Intends to Establish Base on Ellesmere Island

Washington.—With all three of its aeroplanes assembled, test flights were conducted at Etah, Greenland, by the MacMillan Arctic expedition, one being to a height of 5,000 feet and over glaciers. Lieut.-Commander Byrd, commanding the navy section of the expedition, said in his radio message to the navy department, that, despite the encountering of bitterly cold temperatures, the motors behaved perfectly.

It is understood to be the intentions of the expedition to next establish a base on Ellesmere Island, across from Greenland, about half way to Cape Thomas Hubbard, on Axel Heiberg Island, where the advance flying base will be located, overlooking the polar sea.

## St. Helena Welcomes Prince

Visit Paid to Place Where Napoleon Was Interned

St. Helena.—A guard honor of British ex-servicemen, Boy Scouts and Girl Guides, and enthusiastic crowds welcomed the Prince of Wales here when he landed from the Repulse for a short stay on his way from Cape Town to South America.

The Prince went to Government House, where he received prominent members of the community. Later he visited Longwood, where Napoleon was interned, and was shown around the estate.

In the afternoon Wales played golf, and in the evening was the guest of honor at an official dinner, afterward attending a reception and dance.

## Cancelled Sailings To China

Missionaries Will Go In October If It Is Considered Safe

Toronto.—Accepting the judgment of the West China mission, the Methodist mission board of the United Church of Canada cancelled the sailings arranged for 28 persons scheduled to leave Vancouver for Shanghai and Chungking, September 3.

Officials were instructed to arrange bookings for the middle of October, as that was the earliest date considered safe by leaders now in the field. Eight missionaries, five missionaries' wives and 15 children were included in the party affected.

## Cannot Unveil Memorial

Edmonton, Alta.—In a wireless dispatch from the steamship Distributor to the Edmonton Journal, Major Hodgson, private secretary, announces that Lord Byng regrets he will be unable to unveil the memorial at Strathmore, Alta., this summer, as his list of engagements in the west for this year is quite full.

## Woman Executed in Ireland

Dublin.—A rare event in Ireland—the execution of a woman—took place in Mount Joy prison, when Anna Walsh and Michael Talbot were put to death for the murder of the husband of Mrs. Walsh at Limerick. Talbot was a relative of the victim.

## For Prairie Harvest

Victoria, B.C.—More than 200 men will leave Victoria for the fall harvest on the prairies in the next few weeks, according to the department of labor here.

## ALLIED DEBTS DISCUSSED BY BRITISH HOUSE

London.—The question of the allied debts to Great Britain was discussed briefly in the House of Commons when Walter Edward Guinness, financial secretary of the treasury, in replying to a question, said he presumed the debt negotiations with France which had been interrupted by the return of the French experts to Paris, would be resumed in due course.

When a member asked if the negotiations had ended, as reported, in "an acrimonious breaking off," Mr. Guinness replied emphatically: "Nothing of the kind!"

Mr. Guinness continued that a preliminary exchange of views had taken place with the Italian Government regarding Italy's debt to Great Britain. He said he understood Italy was framing proposals on this subject. He concluded that while not all the governments to which the recent British note was addressed had replied, he had no reason to suppose any of them would raise any difficulty with regard to the principles enunciated in that note as a fundamental basis for any debt settlement.

## Will Assist In Fruit Probe

R. F. McWilliams, K.C., of Winnipeg, To Act With Government Attorney

Winnipeg.—An announcement was made that R. F. McWilliams, K.C., of Winnipeg, had been appointed as chief assistant to J. C. McIner, K.C., of Toronto, in conducting the investigation into the affairs of the Nash Fruit Interests throughout Western Canada.

Action was taken against the company under the Dominion Combines and Investigation Act, and the books of the various company branches seized by the Royal Canadian Mounted Police. The books are now being audited under supervision of government agents.

## Will Keep Government House

Edmonton.—By a vote of 32 to 7, the Alberta Legislature, on motion of Dr. J. S. Stewart, Conservative, Lethbridge, seconded by Premier Greenfield, rescinded the Davidson-McKeen motion of March last, calling upon the government to sell or otherwise dispose of Government House.

## Compromise Motion On Natural Resources

Alberta Urges Government to Close Negotiations For Transfer

Edmonton.—At a recent session of the legislature, a compromise motion on the natural resources question was unanimously agreed upon, and will be sent to the Federal Parliament at Ottawa. The motion is as follows:

"That this legislature should strongly urge the Government of Canada to use every effort to facilitate the closing of negotiations for the transfer of the natural resources to the province of Alberta, based on the general principles embodied in the draft agreement submitted, and as to the details thereof, upon terms and conditions that can be accepted as fair and equitable."

## British Women Gain Victory

Admitted to Royal College of Surgeons On Equality With Men

London.—British women have gained another victory in their fight for equal rights with men when the Royal College of Surgeons decided to admit women on the same terms and under the same conditions as men. Hereafter, women have been admitted to the college as fellows and members, but without the right to vote as members of the college for the council, which is the executive body of the college.

In the future, women also will be eligible for seats on the council, which right heretofore has been denied them. There are at present 13 women fellows and members who are affected by the decision.

## Honor Memory Of Canadian Author

Admirers of Louis Hemon Place Tablet in House at Brest, France

Paris.—The memory of Louis Hemon, famous Canadian author, has been honored, thanks to his Canadian admirers, when a bronze tablet was placed in his natal house at Brest. The town of Quimper already has named one of its principal streets after the author, who has been said to be more celebrated throughout the world than in his own country.

The tablet bears this inscription: "In this house was born Louis Hemon, author of *Maria Chapdelaine*. This tablet was placed by his admirers in Canada."

## EARL HAIG AS ENGINE DRIVER

When Field Marshal Earl Haig crossed the Canadian Rockies on his special Canadian National Railways train, he expressed a wish to view the scenery from the cab of the engine rather than from the observation car, which was attached to his train. He therefore took the throttle of the locomotive at Hike River and drove his own engine for several miles. Upon per photograph shows him aboard the engine of his special, while below he is shown with Countess Haig, looking out toward Mount Robson, the highest peak in the Canadian Rockies.

## GOLD STANDARD WORKING WELL SAYS CHURCHILL

London.—Britain's return to the gold standard, which, during recent weeks, has drawn forth a swelling chorus of discordant, chorus of adverse criticism from various sources, was staunchly defended in the house by Winston Spencer Churchill, chancellor of the exchequer.

Unquestionably, Mr. Churchill declared, the gold standard affected everything to a certain degree, and anyone could argue the fact that things which were disagreeable which had happened since the gold standard was restored was due to its restoration. But disagreeable things always were happening, he remarked. He then asked that the government's action be judged not by fluctuations occurring over short periods but by its value for the long run.

"If England had not taken the action she did," the chancellor continued, "the British empire would have taken it without us and come on to a gold standard at the pound sterling but of the dollar."

The chancellor said he was cognizant of the growing tide of criticism and propaganda against the gold standard, but he pointed out that the critics disagreed among themselves, and that no political party had challenged the government to action. The government was "entirely unrepentant."

## Many War Claims Filed

Saskatchewan Residents Ask Indemnity From Germany For Losses

Regina.—Twenty-two war claims amounting to over \$100,000 have been filed by Saskatchewan residents against Germany as a result of her activities during the war. The majority of the claims are for loss of personal effects and in some cases for loss of relatives. Several claims, which were tormented by the Germans, according to James Friel, K.C., Ottawa, war claims commissioner.

Inglis Sheldon Williams, of this city, had the most interesting claim to present to the commissioner. His claim is for \$4,000 for drawings and paintings lost at sea through enemy action.

Mrs. Gertrude Alice E. Dowdley, now of Winnipeg, has a claim for \$30,000 for the loss of her husband on the ill-fated Lusitania. Mrs. Martha Ellen Matthews, of 19 Utopia Block, Moose Jaw, also claims \$40,000 for the loss of her husband on the Lusitania.

Khamis Michael, of Moritach, born in Turkey, but domiciled in Canada in 1906, has a claim for \$56,377 for the loss of his son, personal injuries, and injuries to his wife and family in addition to personal property loss.

## Difference Over Security Pact

Matter Not Ready For Discussion Between Foreign Ministers

London.—Aristide Briand has created an awkward situation for the British Government by his announcement that he is coming to London to talk with Austen Chamberlain on the security pact without having first consulted Mr. Chamberlain about the date.

A serious difference of opinion has arisen between the French and the British over the drafting of a note replying to the latest German communication on security, and there is still much to be thrashed out before the matter is ready for discussion between the foreign ministers. The situation is not helped by the disagreement on a debt settlement. The French offer is so small as to be contemptible, and the comments of the French press on the British refusal to accept it, show there is no real desire of the French to meet their obligations.

## Minister Wins Bard's Crown

Pwllhel, Wales.—The bard's crown of the Welsh chieftain, national festival for the encouragement of music and literature, has been won for the third time by Rev. William B. Evans, of Bridgend, Wales, who was winner in 1913 and again in 1917. Ten thousand persons attended the festival, delegations coming from the British colonies and Dominions and from the United States. There were more than 3,000 entrants in the competitions in music, drama and poetry.

## Alice Discovers New Wonderland at Wembley

"The animals went into the Ark in case it should rain." "Long John Silver was also there."

"I know what we'll do," said Alice, "let's go to Wem-  
bley." "What do you want to go to Wembley for?"  
asked the Walrus, who was always asking foolish ques-  
tions anyway.

"I want to see the sailing ships and sealine-wax and  
cabbages and kings," replied Alice.

"Ha, ha," laughed the Walrus, "you won't see any  
sealine-wax there, it's all at Madame Tussauds and I  
have my doubts about the cabbages, too."

"Well, I shall see lots of sailing ships and kings,"  
said Alice starting to cry, for she was very fond of  
cabbages, "and, anyway, if you go to the Exhibition  
alone you won't be able to get in to Treasure Island all  
they don't admit adults unless they are escorted by  
children."

"Oh, all right," said the Walrus, who, being 182  
years old, no longer regarded himself as a child and  
had secretly wanted to go to Treasure Island all the  
time.

So away they went.  
When they arrived at Treasure Island they found a  
real train—not a very big one, it is true, but, neverthe-  
less, the real train in the world—puffing like a  
grampus, at a little station labeled *Benefit*, as if anxious  
to get on its way around Wonderland.

"Look," said Alice, "there's Peter Pan."

"That ain't Peter Pan," said the Walrus, whose educa-  
tion had been sadly neglected, "that's a Canadian  
Pacific engine."

"I don't care," answered Alice, starting to cry again,  
for, like all modern children, she hated to be cen-  
sured by her elders, "it's called Peter Pan because it  
runs everywhere and never gets old or tired." The  
sly reference to his age effectively rebuffed the Walrus,  
who now relapsed into silence, and didn't say another  
word until they were—*zoom* in the little train and slowly  
pulled out of *Benefit*.

It would take too long to describe all the things they  
saw or all the wonderful people they met, but they  
had such an interesting time that Alice soon forgot all  
about her cabbages and sealine-wax.

There was Long John Silver, with his one eye and  
wooden leg and piratical disposition; and there were  
Mother Goose, Sir Francis Drake, Robinson Crusoe and  
Man Friday, Humpty Dumpty, Little Bo Peep, Jack and  
Gill and all the other fairyland people Alice had read  
about but never met before. And they saw the animals  
going into the Ark which Noah had provided for  
them in case a rainy day should come along and wash  
off all their paint.

Of course, they saw lots of other things, too — the  
Rocky Mountains, for instance, and the Golden Hind.

"While we're about it," said Alice, when they had  
seen all there was to see at Treasure Island, "we  
might as well go in and see the 'Canadian Pacific  
Pavilion.' Everybody goes there, you know." So in  
they went, and saw all the good things to eat and wear  
and work with that they have in Canada. They were  
shown around the building by a man in blue who had  
"C.P.R." on his epaulettes, and explained to them  
that the initials meant Canadian Pacific Railway, and  
that they had put up this building and made Treasure  
Island in order to let the boys and girls in England  
know what a fine country Canada is. But it presently  
began to get dark and Alice had to take the Walrus  
home and give him a bath before he went to bed.

"Well, that's that," remarked the Walrus, when they  
got outside.

"Of course, it is," replied Alice, "what else would it  
be?" "I mean it's all over now," grumbled the Wal-  
rus who had been annoyed because Alice had refused  
to allow him to "tip his jack" with the other animals,  
and "you didn't see any sealine-wax or cabbages, and  
not many kings either."

"That's quite true," replied Alice patiently, "but I've  
got out a lot about Canada and I've had a jolly  
good time, so you may grouse as much as you like—  
I'm quite satisfied."

And so they went home, and the funny part of it is  
Alice did not wake up—for she had not been dream-  
ing at all.

## Here and There

During July thousands of osteo-  
paths gathered in Toronto from 14  
parts of the United States and Can-  
ada to attend the International Con-  
vention of Osteopaths. Several of  
the visitors toured the country in  
the interests of osteopathy.

Final figures showing the total  
live lobster catch on the Nova Scot-  
ia coasts, for the season ending  
June 1st, show a total of 5,555,900  
lbs. valued at \$1,364,141, an increase  
over the 1924 season of 2,887,400  
lbs., in quantity and approximately  
half a million dollars in value.

During his tour of Western Can-  
ada over the Canadian Pacific's lines,  
Field Marshal Earl Haig was re-  
ceived on all sides by cheering and  
enthusiastic crowds. At towns in  
northern Ontario and elsewhere he  
shook hands and exchanged remini-  
scences with local ex-service men,  
many of whom he recognized.

Having concluded his visit to the  
Pacific Coast, His Excellency Lord  
Byng, Governor-General of Canada,  
has returned East. Before leaving  
the West His Excellency stayed off  
for a few days at Banff to meet Earl  
Haig, and the two famous soldiers  
spent some time together talking  
over old times.

Considerable interest has been  
aroused in London, England, over  
the arrival there of 8,000 peony  
blooms for exhibition in the Cana-  
dian Pacific pavilion at Wembley.  
The peonies were grown by W. Or-  
miston Roy of Montreal, and have  
been sent to England to dispel the  
belief that Canada's climate is ex-  
cessively cold.

A delegation of prominent news-  
paper proprietors and journalists  
from Great Britain passed through  
Canada recently on their way to at-  
tend the Third Imperial Press Con-  
ference to be held at Melbourne,  
Australia, during September. Be-  
sides the delegates from the British  
Isles, representatives of Canada and  
the other Dominions have been in-  
vited and will attend the conference.

Two automobile accidents occurred  
in Montreal over the week-end at  
railway crossings, in both of which  
it was proven that the car struck  
the train. In the first accident the  
car ran into the first car behind the  
engine and in the second struck the  
side of the engine itself. Public at-  
tention has been directed to these  
accidents as illustrative of the re-  
sults of negligent driving.

Early in July a party of one hun-  
dred French-Canadians associated  
with the University of Montreal de-  
parted from Windsor station on a  
three-week educational tour of the  
country under the auspices of the  
University. Mayor Duquette of  
Montreal, Monsignor A. V. J. Piesse,  
rector of the University and Prof-  
essor E. Montpetit, one of his as-  
sociates accompanied the party. They  
were seen off at the station by E. W.  
Beatty, K.C., chairman and pres-  
ident of the Canadian Pacific Rail-  
way and other officials.

A similar excursion to the above  
left Toronto, July 20th, for the ben-  
efit of English speaking school-  
teachers. This tour, also lasting  
three weeks and covering all prin-  
cipal points of the Dominion was  
conducted by Dean Sinclair Laird of  
MacDonald College under the aus-  
pices of the Teachers' Federation of  
Canada.

# DAREE, SON OF KAZAN

James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page &amp; Co.

"DAREE, SON OF KAZAN," a Vitaphone Picture, With Wolf, the War Dog. is an Adaptation of This Story

## Synopsis

Daree, son of Kazan and Gray Wolf, reached the climax in the first chapter of his education when he saw an owl swoop down and kill a snowball rabbit. Then the gray owl attacked Daree. The dog buried his teeth in the bird's breast but the owl fastened its beak on Daree's ear. Daree's hands clung on one of the owl's tender feet and the dog's ear was freed. Together the antagonists fell into a creek and the owl flew away.

## CHAPTER III.—Continued.

When he went on, continuing in the direction he had been following yesterday, he slunk along in a disheartened sort of way. His head and ears were no longer alert, and his curiosity was gone. He was not only stomach-hungry; mother-hunger rose above his physical yearning for something to eat. He wanted his mother as he had never wanted her before in his life. He wanted to snuggle his shivering little body close up to her and feel the warm caressing of her tongue and listen to the mothering whine of her voice. And he wanted Kazan, and the old windfall, and that big blue spot that was in the sky right over it. While he followed again along the edge of the creek, he whimpered for them as a child might grieve.

The forest grew more open after a time, and this cheered him up a little. Also the warmth of the sun was taking the ache out of his body. He grew hungrier and hungrier. He had depended entirely on Kazan and Gray Wolf for food. His parents had, in some ways, made a great baby of him. Gray Wolf's blindness accounted for this, for since his birth she had not taken up her hunting with Kazan.

"Across this sand, half an hour later, came a huge black bear."

and it was quite natural that Daree should stick close to her, though more than once he had been filled with a great yearning to follow his father. Nature was hard at work trying to overcome its handicap now. It was struggling to impress on Daree that the time had now come when he must seek his own food.

With the thinning out of the forest the creek grew more shallow. It ran again over bars of sand and stones, and Daree began to note along the edge of them. For a long time he had no success. The few crayfish that he saw were exceedingly little and elusive, and all the clamshells were shut so tight that even Kazan's powerful jaws would have had difficulty in smashing them. It was at most noon when he caught his first crayfish, about as big as a man's forefinger. He devoured it ravenously. The taste of food gave him fresh courage. He caught two more crayfish during the afternoon.

With the approach of night Baree's fears and great loneliness returned. Before the day had quite gone he found himself a shelter under a big rock, where there was a warm, soft bed of sand. Since his fight with Papayuchseew, he had travelled a long

distance, and the rock under which he made his bed this night was at least eight or nine miles from the windfall. It was in the open of the creek bottom, with the dark forest of spruce and cedars close on either side; and when the moon rose, and the stars filled the sky, Baree could look out and see the water of the stream shimmering in a glow almost as bright as day. Directly in front of him, running to the water's edge, was a broad carpet of white sand. Across this sand, half an hour later, came a huge black bear.

Until Baree had seen the others at play in the creek, his conceptions of the forests had not gone beyond his own kind, and such creatures as owls and rabbits and small feathered things by size, and Nekki was not half as big as Kazan. But the bear was a monster beside which Kazan would have stood as a mere pigmy. He was big. If nature was taking this way of introducing Baree to the fact that there were more important creatures in the forests than dogs and wolves, and owls and crayfish, she was driving the point home with a little more than necessary emphasis. For Wakayoo, the bear, weighed six hundred pounds if he weighed an ounce. He was fat and sleek from a month's feasting on fish. His shag coat was like black velvet in the moonlight, and he walked with a curious rolling motion with his head hung low. The horror grew when he stopped broadside in the carpet of sand not more than feet from the rock under which Daree was sheltering as if he had the

gaze. The bear, weighed six hundred pounds if he weighed an ounce. He was fat and sleek from a month's feasting on fish. ## CHAPTER IV.

When Baree ventured forth from under his rock at the beginning of the next day, he was a much older pup than when he met Papayuchseew, the young owl, in his path near the old windfall. If experience can be made to take the place of age, he had aged

Aspirin is the trade mark (registered in Canada) of Bayer's manufacture of Aspirin.

A great deal, in the last forty-eight hours. In fact, he had passed almost out of puppyhood. He awoke with a new and much broader conception of the world. It was a big place. It was filled with many things, of which Kazan and Gray Wolf were not the most important. The monsters he had seen on the moonlit pool of sand had roused in him a new kind of caution, and the one greatest instinct of beasts—the primal understanding that it is the strong that prey upon the weak—was awakening swiftly in him.

If he could only find something to eat! That was the master thought that possessed Baree. Instinct had not yet impressed upon him that this which he saw all about him was starvation. He went on, seeking hopefully for food. But at last, as the hours passed, hope began to die out of him. The sun sank westwards. The sky grew less blue; a low wind began to ride over the tops of the stumps, and now and then one of them fell with a startling crash.

Baree could go no farther. An hour before dusk he lay down in the open, weak and starved. The sun disappeared behind the forest. The moon rolled up from the east. The sky glittered with stars—and all through the night Baree lay as if dead. When morning came, he dragged himself to the stream for a drink. With his last strength he went on. It was the wolf urging him—compelling him to struggle to the last for his life. The dog in him wanted to lie down and die. But the wolf-park in him desired stronger. In the end it won. Half a mile farther on he came again to the green timber.

(To be continued)

## The Newest Antonym

A teacher was instruction her class in the use of antonyms. "Now, children," she said, "what is the opposite of sorrow?"

"Joy," shrieked the class in unison. "What is the opposite to pleasure?"

"Pain."

"And what is the opposite to woe?"

"Gladness." The Outlook.

## ONTARIO WOMAN REGAINS HEALTH

Wants Other Women to Know About Lydia E. Pinkham's Vegetable Compound

Mount Forest, Ont.—"Before I took Lydia E. Pinkham's Vegetable Compound I felt weak and miserable, and had pains all through me. I was living in a state of misery. One day a friend came in and told me of the Vegetable Compound, and I decided to take a bottle. I began to get stronger and those pains left me. I am glad to find out about this medicine as I think there is none equal to it for women who have troubles of this kind. I cannot praise the Vegetable Compound too highly for the good it has done me. Whenever I know of a woman suffering I am glad to tell her of it."—Mrs. Wm. R. R. No. 1, Mount Forest, Ontario.

Women throughout the Dominion are finding health in Lydia E. Pinkham's Vegetable Compound. No harmful drugs are used in its preparation—just roots and herbs—and it can be taken in safety even by a nursing mother. For sale by all druggists.

## Could Not Be Mistaken

Explorer Tells How Lizard Reached Its Admirer

In "Adventures in Exploration at the World's End," William Beebe, the explorer, says: No sooner had I passed beyond the open sandy beach of Galapagos Island, than little lizards began to dart along my path.

I crept up to the first one I saw, anxious to get a photograph, and while looking into my camera almost trod upon it, so tame was it. While waiting for it to turn sideways, a big male crawled between my feet and nodded frantically to a scarlet-throated female sunning herself on a bit of lava. He crept a little nearer, nodded again, whereupon the lady lizard rose as high as possible upon all four legs, pushing them back like straight little sticks, arched her body, bow herself up to him until she lost all semblance to a lizard, and, turning her head slowly, spat upon her admirer. He turned, nonchalantly caught a fly, and sadly made his way elsewhere. Never have I seen such a sudden transformation or a more unmistakable indication of disposition.

## Last But Twelve Hours

Flowers of Night-Blooming Cereus Withers At Dawn

Of the many beautiful flowers of the Hawaiian Islands, the night-blooming cereus stands out by itself. It comes of the cactus family and is without competition, as it is the owl of the flower kingdom. The life of the flower is about twelve hours. The buds begin to open as the shades of night gather, and by the time darkness settles the flower is fully open. But with the coming of the morning it begins to close and, whether, never to open again.

These flowers come in countless numbers and are nine inches in length, and from six to eight inches across. The petals are snow-white, while the deep calyx is a rich yellow.

June, July, and August is the blooming season, but there is only one night when the buds come forth in all their glory. On that night the people of Honolulu turn out to pay homage to this queen of flowers.

It Bids Pain Begone.—When neuralgia racks the nerves or rheumatism cripples the back it is time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

## A Triumph

"There!" said the seaside girl, as she laid down her pen. "I think that a record! Twenty-four postcards and only nine beginning. 'Just a line to let you know!'"

## A Homely Illustration

Toasting Bread Shows Main Principle

Accounting For Heat at Equator Every time we toast a piece of bread we are illustrating the main principle which chiefly accounts for the earth being hotter at the equator than at the poles. If we hold the bread parallel with the fire, it gets the full heat, but if we tilt it slantwise, it takes longer to toast. The equator is the part of the earth's globe that gets the most direct rays from the sun, the poles the parts that get the most slanting rays. In the one case, we get a sun directly overhead at some part of the day; in the other, the sun at its very best only "rises" to a point low down on the horizon, and so gives off rays extremely on the slant. These slantwise rays, too, have to pass through much more atmosphere than the straight rays, and so our atmospheres acts as a sort of blanket, with its mist and fog, it follows that the heat of the slanting rays is still further reduced in power. Other considerations also have their bearing upon the question, but the straight versus slantwise rays are the main factor in the comparative heat of the equator over the poles.

## Which Did He Want

She: I noticed you hesitated when I asked you if I was the only girl you had ever loved.

He: Yes; I couldn't tell from your expression whether you wanted me to say "No" or "Yes."

Minard's Liniment for Corns and Warts

After eating or smoking Wrigley's chewing gum refreshes and sweetens the breath. Nerves are soothed, throat is refreshed and digestion aided. So easy to carry the little packet!

Wrigley's

after every meal!

Good News For Italian Prisoners An amnesty, a decree of far-reaching proportions, freeing all political offenders, except murderers, and releasing from the jails prisoners of all kinds, has been granted as an act of royal clemency, and as a contribution to national pacification, on the occasion of the completion of the quarter century reign of King Victor Emmanuel. It is estimated that between ten and 12,000 persons will be affected.

## SUMMER COMPLAINTS KILL LITTLE ONES

At the first sign of illness during the hot weather give the little ones Baby's Own Tablets or in a few hours they may be beyond aid. These Tablets will prevent summer complaints if given occasionally to the well child, and will promptly relieve these troubles if they come on suddenly. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine as good and the mother has the guarantee of a government analyst that they are absolutely safe. The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Sees Orient Great Wheat Importer A prophecy that the Orient would become, in the near future, a really large importer of Canadian wheat, was made by Hon. Dr. J. H. King, Ottawa, minister of public works.

In predicting increased Orient trade in grain, Dr. King pointed out that imports of wheat from Canada for 1922-23 increased 400 per cent.

Minard's Liniment for Aches and Pains

A German inventor has perfected a machine for measuring the height of aeroplanes. The apparatus times the echo from the craft to the ground within one ten-thousandth of a second.

## The Right Way to Boil Potatoes

Put the potatoes in an SMP Enameled Potato Pot. Cover with water. Add salt to taste. Boil until soft. When finished, drain off all the boiling water through the strainer above. No danger of steam scalding the hands because the handle securely locks the cover on. If your family uses potatoes, you require one of these.

### Stony Plain and District.

Mr and Mrs Ph Miller returned to Stony from Banff yesterday.

Miss McMillan of Edmonton was the guest this week of Mrs Gates.

While cranking his Gray Dort car on Tuesday Mr L Kowensky had the misfortune to fracture his right arm.

A meeting of the Executive of Stony Plain Amateur Athletic Sports Assn. is called for the evening of Saturday Aug. 15.

Arrangements are being made for the holding of the annual Mission Festival of Blueberry Church on Sunday next, Aug. 16th.

Mr Joe Schullter, Winnipeg, was a week-end visitor with Mr Joe Fuhr, Spruce Grove District.

Hy Giebelhaus is said to have purchased the 30 acres and 10-roomed house at Glory Hills, the property of Rev J Birk, formerly a pastor at Glory Hills.

A good crowd was present at the Winterburn Hall dance Friday night last, when Martin's orchestra supplied the music.

The Alberta Hotel at Onoway was burned to the ground Tuesday night, the occupants having a narrow escape.

A sitting of the Supreme Court will be held in Edmonton on Monday, August 17, when applications for citizenship papers will come up for examination.

There will be no shooting of Hungarian Partridges this fall, as a close season has been declared in the area north of the North Saskatchewan river.

U. F. A. shipping day at Duffield is Wednesday next, August 18.

### Rosenthal.

On Sunday last, Sunday the 9th, in Emmanuel's Lutheran Church at Rosenthal (Rev G Poetzsch, pastor) the rite of Confirmation was administered to the following children: Herman Kotscherofsky, Elsa and Frieda Lutzenberger, Elizabeth Kulak and Louisa Zahn. After examination and confirmation in the Christian faith the catechumens were admitted to the Lord's Supper for the first time.

At the same service the young daughter of Mr and Mrs Ph Kulak (Violet Pearl, born July 6th) was baptised by the pastor.

The new church building at Rosenthal is rapidly nearing completion.

### Golden Spike

On Sunday August 9 the Rev P Hanneman was installed as pastor of the Evangelical Lutheran St Paul's church at Golden Spike. The Rev E Tuerkheim of Edmonton officiated on behalf of the President of the Manitoba Synod, and preached the sermon at the installation service.

In the afternoon this congregation celebrated its Annual Mission Festival. The speakers were the local pastor and the Rev E Tuerkheim. Many friends of the congregation were present at both services.

### Sporting Notes.

The baseball tournament at Duffield on the 9th was a huge success. Teams were present from Onoway, Wabamun, Duffield, and the Walther League team from Stony Plain was present.

The first contest was between Duffield and Walther League. It looked like Duffield's game, the first few innings, as the Leaguers were behind a few runs up to the 5th when by some good combination they topped the score. In the 9th Duffield tied the score at 10-10, and succeeded in winning the lucky run by some good playing. Stony had a good bunch of rooters, who took their team's defeat in a very sportsmanlike manner.

Contest No. 2 was between the two old antagonists—Wabamun and Onoway, this game being one-sided right from the start, Onoway jumping out in the lead, and keeping it to the end. Wabamun players at times put up some pretty good ball, but apparently were out of practice. The final score in this game was: Onoway 13 Wabamun 4.

The final and deciding game centred on Duffield and Onoway, with each team none too fresh.

Walther Leaguers—John Ulmer; Carl, Philip and Louis Enders, Conrad Fuhr, John Miller, Hy Treit, Val Mohr, and Joe Ulmer.

A large crowd was present throughout the games, over fifty cars being on the grounds, some of these having come from Edmonton.

The basketball game between Mewasin and Duffield resulted in a win for the latter by 20 goals to 2. H Treit refereed.

Manager Schmidt is taking his Walther League players to the baseball tournament at Wetaskiwin, Monday next.

### New Conservative Leader.

A. A. McGillivray, K.C., of Calgary, was elected unanimously as leader of Alberta Conservatives, at the big convention held at the Macdonald Hotel, in Edmonton, last week. He was nominated by E F Ewing, K. C., a former leader.

Messrs Otto Oppertshamer and G W Donaldson, representing Stony Plain district, and S C Hagen and H G W Mortimer, Winterburn.

### Stony's Successful Pupils.

Grade 8—

Stony Plain Public: Lily Myer, Jack H Mohr, Lorne Oatway, Catherine L Alt, Giles Clarke, Manly Donaldson, Gayne Davis, Elisabeth Kulak. Three other pupils wrote the exams in this grade—contrary to the advice of their teacher.

St Matthew's No. 2: Margaret Miller, Walter Oppertshamer, Hy Trapp, Matilda Rüdgers, Emma Armbruster. Seven wrote.

St Matthew's No. 1—Valdille Enders. Three wrote.

Stony Plain High: Grade Ten—Martha Hennig, passed. Six wrote.

Blueberry School: Grade 8, passed, Mary Emily Wendel and Tom Robertson.

Hansen Corners School—Passed Gr. 8, H Stevenson.

### Peace River Railway.

In the short adjourned session of the Legislature held last week the matter of the leasing of the E. D. & B. C. Ry. was dealt with. Premier Greenfield explained that the Royal Bank, as holders of the common stock on the railway, had refused to consent to a lease of the line to any railway company before settlement of its claim against the road had been made, and that the bank asked \$2,000,000 in settlement of these claims. He announced that the government would not recommend the payment of this amount. Later in the session it was announced that the bank had reduced its price to \$1,700,000, but the government still is opposed to accepting this.

### Hay Prices High Next Winter

In Eastern Ontario and Quebec the farmers are at present experiencing an unusual difficulty in harvesting the hay crop on account of the heavy and frequent rains which have occurred almost every day in many districts during the past two or three weeks. As a result, there is expected to be a lot of hay saved in poor condition. In western and southern Ontario the hay crop was very short, and dealers expect good hay to be at a premium next winter.
